DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 37-46, drawn to system for obtaining data to ensure processing of mailpiece, classified in class 700, subclass 224.
- II. Claims 47-70, drawn to system and process for using data to reconstruct a code, classified in class 209, subclass 3.3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as executing sorter application software. Also in the instant case, invention I has separate utility such as obtaining data to ensure a mailpiece is processed to a desired level. Invention II has a separate utility such as reconstructing a first code (Invention I mentions this, but as it is an apparatus Group, the peripheral recitation of what might have happened to a first code is not germane to the scope of the invention, which has nothing to do with what the data from the ICS is used for). See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 3653

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Examiner has assumed that Applicant has permanently decided to withdraw claims 1-36 and 71-140 and thus has not included them in the restriction requirement. However, as the next action will be a first action on the merits, Applicant is free to choose any of the disparate groups/species which have been set forth in any of the restriction requirements for examination, so long as a single group-species combination is chosen. Groups I and II in this action are within and originate from original Species I set forth in paper #11 which was a part of original Group II set forth in paper #5. Applicant, corresponding to the latter sentence, has already selected Group II, Species I. Groups I and II of the instant action are within that Group II, Species I, and thus could be termed Groups I-II-I (Group I, Species I, Group I) and Groups I-II-II (Group I, Species I, Group II), but the Examiner has foregone such nomenclature in the assumption that Group II, Species I, is the invention to be pursued in the instant application.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3653

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
